

SWAPLOADER[®]

hooked on quality U.S.A. LTD.

SwapLoader operates as a mount/dismount system and as a true dump truck. A **high dumping angle** assures the user of the ability to dump any and all loads quickly and efficiently. SwapLoader hoists include a **safety valve** to prevent jib operation in dump mode.

SwapLoader hook-lift hoists are available in **9,000 to 65,000 pound capacities** and will accommodate truck bodies from **10 to 24 feet in length**. This means there's a SwapLoader built just for you and your demanding jobs.

The **Low Pressure Hydraulics** provide the operator with hydraulics that are compatible with locally available hydraulic motors and cylinders.

Dual Lift Cylinders give added stability and the surety of dumping safety and convenience.

SwapLoader's unique **Slide-Through Body Lock** design secures the body to the hoist whenever dumping the load. The **Sliding Jib**, in conjunction with the Slide-Through Body Locks, gives ease in maintaining proper weight distribution while dumping heavy loads.

The **Dual Pivot Rear Section** assures the ability to handle the heaviest loads with the SwapLoader hoist secured in the body locks when in the dump mode.

A **3-year test program** with zero defects is conducted on all new models. This rigorous testing assures you that no SwapLoader model is put on the market before it measures up to SwapLoader's exacting quality standards.

Exclusive three year warranty demonstrates our assurance to you that you can depend on SwapLoader quality.

SwapLoader Hook-lift Hoist System

Who's a potential SwapLoader user?

- Anyone who uses a variety of trucks to accomplish many different tasks.
- Anyone transporting waste, materials, product or making multiple deliveries on a daily basis. Just to name a few:

Cities
Counties
DOTs
Fire Departments
Universities
Parks & Recreation

Refuse Haulers
Material Haulers
Equipment Haulers
Lumber Yards
Rental Yards
Agricultural Industry

Roofers
Landscapers
Tree Care Industry
General Contractors
Building Contractors
And Much More...

What can SwapLoader offer?

- Versatility limited only by one's imagination.
- Turn a single truck into a small fleet, virtually overnight. It's as simple as placing a sub-frame (a-frame + longsills) under any one of these body configurations seen below. Now your customer can completely switch functions in under 3 minutes:
 - Flatbed
 - Van Body
 - Open-top Container
 - Dump Body
 - Chipper Body
 - Water Tank
 - Sand/Salt Spreader
 - And Many More...
- The seamless ability to share our hydraulic system with other hydraulically powered devices, by adding additional valves and controls. This is thanks to SwapLoader's foresight and use of low-pressure hydraulics.
- The ability to load and unload truck bodies at ground level, reducing the risk of injury to employees use to performing this task 5' in the air.
- Safe and comfortable cab operation. No longer will your customers have to burn unnecessary time getting in and out of the cab (hooking up a cable or trailer).
- 100% Dedication. SwapLoader is the only hook-lift manufacturer in the world to focus all of its resources (engineering, support, manufacturing, and sales) into delivering the best hook-lift hoists system around.
- The **ONLY** complete 3-year Parts Warranty in the hook-lift industry.

Bottom Line:

SwapLoader is an INVESTMENT that will instantly become a part of your customer's daily operation. This is not another piece of equipment that will find an occasional use.

Help your customers stretch their budget dollars and maximize their returns. They face obstacles on a daily basis and now you've got an eye opening answer!!!
